- Where more than one author has contributed to the paper, details of who should be contacted for correspondence.

Headings

The heading should follow the APA style. There are 5 **heading levels** in APA. Regardless of the number of levels, always use the headings in order, beginning with level 1.

Font and Format

All manuscripts should be submitted in Word format, with 1.5 line spacing, 12- point font, font type Times New Roman and 1-inch margins on all sides.

Tables

All tables should be sequentially numbered with Arabic numerals. If the manuscript includes an appendix with tables, identify them with capital letters and Arabic numerals (e.g. Table A1, Table B2).

Figures and Graphs

- Number all the figures consecutively with Arabic numerals.
 - Mention all figures in the text.
 - For figures, include the figure number and a title with a legend and caption. These elements appear below the visual display. For the figure number, type *Figure X*. Then type the title of the figure in sentence case. Follow the title with a legend that explains the symbols in the figure and a caption that explains the figure. **For e.g.,** *Figure 1*. Sensitive Index. This figure illustrates the sensitivity of the prices of the select 30 stocks in the BSE.
 - Captions serve as a brief, but complete, explanation and as a title. **For example,** “*Figure 4*. Population” is insufficient, whereas “*Figure 4*. Population of Tribal Races, Indian Subcontinent (1980)” is better.
 - Graphs should always include a legend that explains the symbols, abbreviations, and terminology used in the figure.
 - These terms must be consistent with those used in the text and in other figures.
 - The lettering in the legend should be of the same type and size as that used in the figure.
- Abbreviations, terminology, probability level values must be consistent across tables and figures in the same article. Likewise, formats, titles, and headings must be consistent. Do not repeat the same data in different tables.
